Technical specifications

- This high technology machine is developed to produce premade fringes for the carpets.
- The basic products are a 2 or 4 pick knot, and a 4 pick Crossbatch.

- The width of the header band can be decided by the producer of the fringes. The standard creel is equipped with 24 positions for the bobbins, but for larger headers, a creel with 48 bobbins can be installed.
- The speed of the rapier is upon 190 rpm, but depends on the material and the type of knot.
- The fringes have a standard length of +/- 85 mm, but can be made shorter by installing the additional cutting station.
- A "Touchscreen" allows to make all settings or to get all information from the machine.
